NUCLEUS · MARKETING

WICS reporting: change request mockups

For Quinn Smith · October 2026

What we're asking for

The Marketing dashboard should report on two things: the **WICS online shop** (Shopify) and the **leads** our Meta Ads generate (Google Ads later). Our goal is **$20,000 a month from the WICS shop alone by April 2027**, with monthly targets per industry from November 2026.

1 · WICS targets by industry

Industries: Red dirt / Mining, Workshops, Commercial / Hospitality, Car detailing, Other. For each one, track revenue, new customers, repeat orders (existing customers and customers won since Nov), total orders, AOV, sessions, conversion rate, checkout completion, ad spend and cost per new customer. Show target vs actual each month with a status.

2 · Leads, split by business

Tolicc's: Meta Ads leads go to the sales reps, so track leads, cost per lead, assigned, contacted and won. WICS: ads send people to the website and we also call them, so track ad clicks, leads called and orders after a call, for each industry ad set. Keep a slot for Google Ads.

Data needed

Shopify orders, customers, sessions and checkouts tagged by industry, so the actuals fill in automatically each month. Meta Ads spend and leads for each ad set.

Targets

All targets in these mockups come from the WICS Working Plan sheet (MoM Reporting tab), Nov 2026 to Apr 2027. Actuals show as "—" because reporting starts 1 November.

Proposed status rule

On track: 100% of target or more · Watch: 90 to 99% · Behind: below 90% · Awaiting data: no actual yet.
